

# Free Trade Agreements Promote Global Warming! No More NAFTAs!

Dear Senator \_\_\_\_\_, Senator \_\_\_\_\_,  
Representative \_\_\_\_\_ and President Obama:

NAFTA-style free trade agreements contribute significantly to the global climate crisis. These agreements:

- Contribute to a global shift towards US-style meat-centered diets, increasing livestock emissions.
- Shift global crop and animal agriculture towards fossil fuel intensive industrial agriculture.
- Displace family farms. These farmers proceed to cut down forests for fuel and new farmland.
- Prohibit environmental selective purchasing agreements through state procurement rules.
- Provide investor protections to extractive industries that undermine environmental laws.
- Undermine "buy local" campaigns that reduce fuel consumption in transportation of goods.
- Contribute to deforestation through highway construction for international shipping.

I urge you to introduce legislation to repeal NAFTA, DR-CAFTA, and the Peru Free Trade Agreement and to oppose the passage of the Colombia, South Korea, and Panama Free Trade Agreements. Please write back with your thoughts on this issue.
