

NO TO PALM OIL! NO TO TPP!

Used for both fuel and food, palm oil is a growing global industry – one that is wiping out rainforests in Malaysia and Peru to replace them with African palm plantations; driving wildlife, including Borneo orangutans, pygmy elephants, and Malayan tigers to the brink of extinction; and displacing indigenous communities. The Malaysian palm oil trade obtains workers through human trafficking and uses forced labor, including refugees from the Rohingya Muslim community fleeing persecution in Burma. And by contributing to deforestation and forest fires, the palm oil trade is actually making climate change worse! The Trans-Pacific Partnership, a massive 12 nation trade deal, threatens to expand the harmful impacts of the palm oil trade by growing the market for this socially and environmentally destructive product.

WHAT YOU CAN DO

Congress must vote to implement TPP before it can take effect. The Obama administration is pushing for a TPP vote after the election in November. We must contact our Senators and Representatives and urge them to go on record against TPP before the election! Let them know that you will not vote for candidates who do not denounce a trade deal that threatens wildlife, the environment, and human rights! Find out who represents you in Congress and how to reach them at <http://gjae.org/leg>.
